School Director: Monday thru Friday 8: to 2: Texas Time Zone

ENROLLMENT MUST BE PRINTED FROM A COMPUTER!

2020 & 2021 brought many challenging changes into our world rapidly. While we are all being encouraged to distance ourselves from one another, We are also being forced to realize just how really connected we all are. Surrounded by a global community of brothers and sisters who are experiencing this together, and who are each being asked to do their part. For many, it is not out of fear for ourselves, but out of respect and love for each other.

We will offer In Person Courses with smaller classes, follow social guidelines and masks are optional - _This common sense protects our students, clients and ourselves. School Instructors / Staff have chosen to be vaccinated and boosted. During these times we are only accepting Twelve Students per class.

Let us remember that we have ALL descended from generations of people who have experienced times of hardship. Let's choose to act with respect, grace, wisdom, breathe, smile and pay attention.

As always. We appreciate the support of our many thousands of students, LIBBE owners & customers. We look forward to safely serving you now and into the future.

Please complete the Enrollment, scan an e-mail to hold your place in class. A prescription (RX) MUST be completed by your Doctor, if possible bring with you.

Primary Instructors are: Jeri and Dr. Bill Tiller. In 1992 became founding Members of I-ACT. Bill was Vice President from 1992 to 1994 and then 1995 to 1999 as President of I-ACT. The NBCHT was formed in 2000 with Bill as the First President serving through 2005. The Tillers are a dedicated, passionate couple.

Note: A small dog that is Jeri's Service Animal is with her at the office every day.

**Previous LIBBE Device Students - Ask about Discounted
Review Course in San Antonio, TX. Only!**

COLON HYDROTHERAPY

- Promotes the loosening and elimination of waste.
- Helps with constipation.
- Assists in elimination through natural peristalsis.
- Approved preparation for cleansing before Colonoscopy.
- Supports Hydration of colon.
- Absolutely safe when performed by properly trained Therapists using FDA Devices.

LIBBE OPEN System Function!

Client/patient undresses from the waist down and will be properly draped throughout the session. The Nozzle/Rectal Tube is gently and easily inserted, the "size of a pencil," single use, and disposable.

The LIBBE System is comfortable and may be operated in privacy for those who prefer solitude.

Temperature controlled water flows through a carbon filter which removes sediment, rust, and chlorine.

The client/patient controls the rate of the water from the gravity-fed column by a Flow Control Knob. The water is purified by an Ultra Violet -Water Purification System, before it passes through the Nozzle/Rectal Tube, and gently into the client/patient. Purified Water flows in.... Feces flows out, when

the client feels the need to release.

The water used during the session at a safely controlled temperature of 98° F to 102°F.

[Water is temperature controlled and can be safely adjusted to client/patient comfort.]

An odor exhaust system insures that the session room and entire center remains totally odor free. Rinsing sprayer is available for the client at the end of the session to rinse off.

Therapist is available to monitor and assist the client as needed. Session's last approximately 45 minutes. After each session the LIBBE is easily and thoroughly cleaned and disinfected.

Advantages:

- It is a simple, safe and effective procedure carried out by Trained Therapists using modern (FDA Registered) Medical Devices.

Benefits of colon hydrotherapy when medically indicated, may:

- Offer immediate relief
- Offer on-going improvement
- Offers positive effects on bowel function
 - hydrate, activate, evacuate

MAY Compliment the Management of certain Health conditions, such as:

- Chronic Constipation
- IBS and other functional bowel diseases
- Cases unable to handle standard preparation
- Cases where avoid unwarranted surgery
- Chronic long standing bowel problems

Open vs Closed Colonic Systems

FDA Registered Medical Device's Effectiveness.

Open System: "The LIBBE"

- The open device is designed to allow warm filtered water gently into the colon and you release when you are ready. The therapist can stay with you or you can **be alone if you prefer solitude**. The therapist is always available and will monitor the device often.
- Active participation- you are in control of water pressure going in and when you decide to release.
- Uses single-use pencil-size Nozzle/Rectal Tube for water flow which is easily inserted in privacy.
- **Allows the colon and bladder to release anytime. "You are in Control"!**
- **No odor, messes, or blowouts.** Waste is released into a basin where odor and feces (waste) goes directly into the sewer.

Closed System:

- The closed device requires the therapist being present throughout the session to control water flow going in and coming out. You cannot release at will.
- Passive participation- the therapist has constant control. You Do Not!

***STUDENTS COMING FOR THE FULL PROFESSIONAL
COLON HYDROTHERAPY COURSE
Strongly recommend YOU at least complete the
OnLine Module W02 Nutrition and Digestive System
and Module W04 Healthy Digestive

How many clients per week do you currently see? _____ What type of equipment do you use? LIBBE

I-ACT Policy Statements

I-ACT requires the use of currently registered FDA equipment and only disposable speculums, rectal tubes, or rectal nozzles. However, should the Therapist use reusable speculums, these speculums should, at a minimum, be autoclaved for sanitation and cleanliness (30 minutes). Additionally, the autoclave unit must be tested and inspected by competent authority at least four times per year- maintain documentation. (Under NO conditions should a disposable speculum or rectal tube be reused). Individuals that use reusable speculums and/or are not using FDA registered devices will be removed from I-ACT membership on 12/31/2018.

I-ACT recognizes the FDA classifies equipment used to instill water into the colon through a nozzle inserted into the rectum to evacuate the contents of the colon into three distinct classes; Class I (Enema Kits), Class II and Class III are (Colon Irrigation Systems). Follow the guidelines of your manufacturer, as approved by the FDA for the type of equipment (devices) you are using. Make no claims as to the use of your device other than those approved by the FDA.

I-ACT recognizes there are two distinct types of colon irrigation systems; open and closed systems. However, it is I-ACT policy that the colon hydrotherapist / technician is always in attendance / or is immediately available to the client throughout the session. The degree of assistance is to be in compliance with the instructions of the manufacturer of the equipment as registered with the FDA, and/or as directed by a physician.

The I-ACT policy on insertion is to require the client to insert the rectal tube or speculum; or, follow the instruction of the referring physician; the guidelines of the manufacturer as approved by the FDA; or the directives from the authority of your city, county, state, or country ordinances.

I-ACT recommends that you do not put the initials (CT) for colon hydrotherapist after your name, write it out in full. According to most state laws, putting initials after your name is not allowed unless you are licensed or have a degree from an accredited professional school.

Advertising copy which states or implies that colon hydrotherapy can treat any disease, promise cure for any disease, or that makes unsubstantiated medical claims SHALL NOT be used.

I acknowledge the I-ACT policies and agree to comply with all I-ACT policies. I understand that failure to comply with the policies listed above may result in my removal from the association.
