Dearest Friends & LIBBE Family ~ 2027

2020 to 2023 brought many challenging changes into our world rapidly. Surrounded by a global community of brothers and sisters who are experiencing this together, and who are each being asked to do their part. For many, it is not out of fear for ourselves, but out of respect and love for each other.

Let us remember that we have ALL descended from generations of people who have experienced times of hardship. Let's choose to act with respect, grace & wisdom,

With over 35 years of providing the **"Highest Quality in Safety and Sanitation"** of FDA Registered Medical Devices and the tested and required colon hydrotherapy supplies, the Tiller family and staff will continue to be "In your Service"!

Instructors: Jeri and Dr. Bill Tiller 1992 became founding Members of I-ACT. Connie Allred (I-ACT Founding Mother) asked Bill to be Vice President, of which Bill Served three years 1992 to 1994 and then as I-ACT President for five years 1995 to 1999 developing many of the education standards still in use today.

NBCHT was formed in 2000 with Bill as the First President serving through 2005. The Tillers, a dedicated, passionate couple with family and exceptional staff have continued to provide SERVICE and TEACH and MENTOR many caring individuals!
(William "BILL" Tiller 10/20/1939 - 10/09/2025)

Jeri: Designer / Founder provides Business & Ethics, Marketing, Legal Use & Safety.
Son; Tom teaches Terminology, Technical, Plumbing and Installation.
Daughter; Misty, Attorney and Quality Control teaches Medical Device Reporting,
David and Jessica: amazing staff, provide hands-on training and support.
Jennifer: provides a review of Anatomy & Physiology with Mind Mapping Techniques

As always. We appreciate the support of our many thousands of LIBBE graduates And I-ACT Members. We look forward to safely serving you now and into the future.

Previous LIBBE Device Students - Ask about Discounted Review Course in San Antonio, TX. Only!

COLON HYDROTHERAPY

- Promotes the loosening and elimination of waste.
- Helps with constipation.
- Assists in elimination through natural peristalsis.
- Approved preparation for cleansing before Colonoscopy.
- Supports Hydration of colon.
- Absolutely safe when performed by properly trained Therapists using FDA Devices.

LIBBE OPEN System Function!

Client/patient undresses from the waist down and will be properly draped throughout the session. The Nozzle/Rectal Tube is gently and easily inserted, the "size of a pencil," single use, and disposable.

The LIBBE System is comfortable and may be operated in privacy for those who prefer solitude.

Temperature controlled water flows through a carbon filter which removes sediment, rust, and chlorine.

The client/patient controls the rate of the water from the gravity-fed column by a Flow Control Knob. The water is purified by an Ultra Violet -Water Purification System, before it passes through the Nozzle/Rectal Tube, and gently into the client/patient. Purified Water flows in.... Feces flows out, when the client feels the need to release.

The water used during the session at a safely controlled temperature of 98º F to 102ºF.

(Water is temperature controlled and can be safely adjusted to client/patient comfort.)

An odor exhaust system insures that the session room and entire center remains totally odor free. Rinsing sprayer is available for the client at the end of the session to rinse off.

Therapist is available to monitor and assist the client as needed. Session's last approximately 45 minutes. After each session the LIBBE is easily and thoroughly cleaned and disinfected.

Advantages:

- It is a simple, safe and effective procedure carried out by Trained Therapists using modern (FDA Registered) Medical Devices.

Benefits of colon hydrotherapy when medically indicated, may:

- Offer immediate constipation relief
- Offer on-going improved muscle tone
- Offers positive effects on bowel function - hydrate, activate, evacuate

MAY Compliment the Management of certain Health conditions, such as:

- Chronic Constipation
- IBS and other functional bowel diseases
- Cases unable to handle standard preparation
- Cases where avoid unwarranted surgery
- Chronic long standing bowel problems

Open vs Closed Colonic Systems

FDA Registered Medical Device's Effectiveness.

Open System: "The LIBBE"

- The open device is designed to allow warm filtered water gently into the colon and you release when you are ready. The therapist can stay with you or you can **be alone if you prefer solitude.** The therapist is always available and will monitor the device often.
- Active participation- you are in control of water pressure going in and when you decide to release.
- Uses single-use pencil-size Nozzle/Rectal Tube for water flow which is easily inserted in privacy.
- **Allows the colon and bladder to release anytime. "You are in Control"!**
- **No odor, messes, or blowouts.** Waste is released into a basin where odor and feces (waste) goes directly into the sewer.

Closed System:

- The closed device requires the therapist being present throughout the session to control water flow going in and coming out. You cannot release at will.
- Passive participation- the therapist has constant control. You Do Not!

10911 West Avenue • San Antonio, Texas 78213 • 210 308-8888 • Fax: 210 349-5679

- HANDS ON LIBBE -

International Association for Colon Hydrotherapy Application

for the

Professional Colon Hydrotherapy Training Course (PCHTC)

*** PLEASE COMPLETE ELECTRONICALLY ONLY ***

Please Note: The Professional Colon Hydrotherapy Training Course is to be used by I-ACT certified instructors/schools to train individuals for the profession. This application includes the various ways an individual may enter the profession, including skills & previous experience and different country locations. I-ACT encourages individuals to check with your instructor which administrative fees are applicable to your situation before completing and submitting this application. The PCHTC program includes both online learning modules and in-person training requirements which must be successfully completed before final certification testing can be administered; see the applicable syllabus for details. ABSOLUTELY NO certification is complete with a successful passing grade on the final exam for certification.

I-ACT Administrative Fee: Please check only the option that fits your situation for entering training.

I-ACT Policy Statements

Please read carefully and initial your understanding of each statement.

_____ I-ACT requires the use of currently registered FDA equipment and only disposable speculums, rectal tubes, or rectal nozzles. However, should the therapist use reusable speculums, these speculums should, at a minimum, be autoclaved for sanitation and cleanliness (30 minutes). Additionally, the autoclave unit must be tested and inspected by competent authority at least four times per year – maintain documentation. (Under NO conditions should a disposable speculum or rectal tube be reused). Individuals that use reusable speculums and/or are not using FDA registered devices will be removed from I-ACT membership effective 12/31/2018.

_____ I-ACT recognizes the FDA classifies equipment used to instill water into the colon through a nozzle inserted into the rectum to evacuate the contents of the colon into three distinct classes; Class I (Enema Kits), Class II and Class III are (Colon Irrigation Systems). Follow the guidelines of your manufacturer, as approved by the FDA for the type of equipment (devices) you are using. Make no claims as to the use of your device other than those approved by the FDA.

_____ I-ACT recognizes there are two distinct types of colon irrigation systems: open and closed systems. However, it is I-ACT policy that the colon hydrotherapist/technician is always in attendance or is immediately available to the client throughout the session. The degree of assistance is to be in compliance with the instructions of the manufacturer of the equipment as registered with the FDA, and/or as directed by a physician.

_____ The I-ACT policy on insertion is to require the client to insert the rectal tube or speculum; or, follow the instruction of the referring physician; the guidelines of the manufacturer as approved by the FDA; or the directives from the authority of your city, county, state, or country ordinances.

_____ I-ACT recommends that you do not put the initials (CT) for colon hydrotherapist after your name, write it out in full. According to most state laws, putting initials after your name is not allowed unless you are licensed or have a degree from an accredited professional school.

_____ Advertising copy which states or implies that colon hydrotherapy can treat any disease, promise cure for any disease, or that makes unsubstantiated medical claims SHALL NOT be used.

_____ Information for all new members outside of Texas: "Colon irrigation devices are prescription devices and their purchase must be authorized by a practitioner licensed by state law to use such devices in that state. A colon hydrotherapist must be supervised by such a practitioner to use a colon irrigation device and must have a written order on file for each procedure from a practitioner licensed by state law in the state where the procedure is to be performed."

_____ Information for all new members inside of Texas: "Colon irrigation devices are prescription devices and their purchase must be authorized by a physician licensed by the Texas Board of Medical Examiners. A colon hydrotherapist must be supervised by such a physician to use a colon irrigation device and must have a written order on file for each procedure from a physician licensed by the Texas Board of Medical Examiners."

I acknowledge the I-ACT policies and agree to comply with all I-ACT policies. I understand that failure to comply with the policies listed above may result in my removal from the association. I further understand that by signing this application, my signature below indicates I have read these statements and will comply with all information contained herein.
